#### **See the Person You're Talking To**

**Tel: 800.477.2334**

With an ACN Video Phone, you are able to see the person you are talking to in real time. Talking on a video phone is as easy as using a traditional phone.

#### **Project Conversations to an External Screen**

Connect the IRIS 3000 Videophone to a computer or TV and project what is on the video phone onto the larger screen.

#### **Video Mail**

Leave a video greeting for callers when you're unavailable and they can leave a video message for you. Access the messages from your phone or your computer from anywhere in the world. Or use a standard phone to hear the audio portion of the message.

#### **Digital Photo Frame**

The ACN IRIS 3000 allows you to upload photos from your computer or camera, then serves as a cherished photo album. By inserting a SD Card or USB Drive, you can display photos on your video phone.

#### **Enhanced Phonebook**

Store up to 300 contacts on your IRIS 3000 and search by name or phone number. You can also add photos of your contacts by inserting a SD Card or USB Drive into the video phone.

#### **Traditional Calling Features**

All the features you have grown to love with traditional phone service are here at no extra cost!

#### **Add On Features**

Choose from our add on features to customize your Digital Phone Service.

**Call to qualify for a  
FREE Video Phone.**

#### **Account Management**

Check your account information including history and voice mail messages from your computer.
