Products and Services Omeganomics

Microsoft DOT-NET - Powerful Open Source Cross Platform Development with C# programming

Omeganomics gives your programmers the ability to develop high performance applications in less time, on any platform.

Your company can join a huge community of millions of developers. Leverage the large ecosystem of components and Open Source software and enjoy online and offline communities to get help. And because .NET is all Open Source, you can join the 17 million developers and over thousands of companies already contributing to the .NET platform. Omeganomics has the foot print and algorithms for maintenance management which include: cost containment, maintenance avoidance, revenue enhancement, and smart sustainability where governance, risk and compliance are paramount to the business of biomedical, clinical, facility, manufacturing, and building maintenance. To learn more about .NET Omeganomics and open source visit:
